

A.ABDUL RAHMAN

Aspiring Software Developer pursuing a B.Sc. in Computer Science. A self-confident and motivated individual, eager to apply my skills in software development.

PROFILE SUMMARY

A motivated and versatile Computer Science undergraduate seeking a challenging role that allows me to leverage my strong problem-solving skills, technical expertise, and passion for innovation. Eager to contribute to cutting-edge projects and solutions by applying my experience in full-stack development, UI/UX design, and foundational IoT integration. I am dedicated to driving high-performance, user-centric solutions across digital platforms, while continuously expanding my technical knowledge and adapting to emerging technologies.

PROJECTS

John Paul Hr Sec School | 2023

Role: UI/UX Designer, Frontend & Backend Developer
Technologies: HTML, CSS, JavaScript, PHP, SQL

Developed a fully responsive website for John Paul Hr Sec School, enhancing its online presence. Led both frontend and backend development, creating an intuitive interface for students, parents, and staff. Designed an efficient admin panel for content management and integrated a dynamic backend to optimize performance and accessibility. This project significantly improved communication within the school community.

Hotel Management Software | Heal N Glow | 2024

Role: UI/UX Designer, Frontend & Backend Developer
Technologies: HTML, CSS, JavaScript, PHP, SQL

Led the design and development of a comprehensive Hotel Management Software, enhancing user experience and functionality. Created responsive and intuitive interfaces to streamline hotel operations using HTML, CSS, and JavaScript. Implemented dynamic backend features with PHP and SQL to manage data, automate bookings, and improve performance. Collaborated with teams to ensure scalability and security, delivering a high-quality product that meets industry standards.
